

Comparing and Ordering Whole Numbers

Use $<$ or $>$ to compare.

1. $19,878 \bigcirc 19,898$

2. $703,864 \bigcirc 703,684$

3. $856,284 \bigcirc 856,248$

4. $101,010 \bigcirc 110,101$

5. **Number Sense** Write three numbers that are between 456,649 and 456,781.

For 6 and 7, order the numbers from least to greatest.

6. 676 6,760 760 7,060 6,607

7. 87,223 87,232 87,332 87,322 87,233

8. Which whale weighed more, the one found in the Great South Channel or the one found in Massachusetts Bay?

Whale	Location	Weight (lb)
A	Florida	112,290
B	Great South Channel	112,336
C	Massachusetts Bay	112,137
D	Cape Cod	112,238

9. Write the weights of the whales in order from greatest to least.

Test Prep

10. Which comparison is correct?

A. $1,011 > 1,101$ B. $1,110 < 1,010$ C. $1,001 > 1,111$ D. $1,010 > 1,001$

11. **Writing in Math** Explain how you would determine if 9,899,989 is greater than or less than 9,898,998.
