

7th grade CTE students were introduced to a variety of Health Care Careers by H-C professionals on October 18th at UVSC.

The students learned about careers that deal with respiratory, cardiology, life flight, health care emergencies, housekeeping, radiology, and laboratory, to name a few.

A PowerPoint presentation was shown about a football player from Grove High School, who suffered a neck injury during one of his games and was not expected to live. He was considered a miracle and has no side effects from this injury and the students were able to meet him and ask him questions.

The students learned a lot about health care and careers that they might consider as they become adults.
