In addition, I got a signature approval for 108 existing Job Descriptions through the corresponding Director and Superintendent. Many of these had need to be revised at the request of the Directors before final approval.

Moving forward, I am contacting each of the Directors with the jobs in their departments that need creation and will continue to work with them to get them done. Some Departments, especially Special Education, have been proactive in coming to me with changes they want to see made with current job descriptions.
