[Return to School Survey - Parent Input](#)

Nebo School District is finalizing plans for providing student instruction in the fall. This plan must follow current guidelines and directives issued by state agencies and the Utah County Health Department. We continue to coordinate efforts involving communication, preparedness, and prevention within our school communities for the purpose of student learning.

For the 2020-2021 school year, please consider the following two options for your student(s):

*\*Note: Final decisions will be made through your school's registration, July 13-30.*

At-School Learning Option:

- All students in school every day - full time
- Parents perform daily wellness check of their student before school attendance
- Social distancing practiced when possible
- Students and employees wear face masks when social distancing is not possible
- Bus students will be required to wear face masks and have assigned seating
- Enhanced sanitizing routines in all instructional and non-instructional areas
- Individualized Education Program (IEP) and 504 plans will be followed

Remote Learning Option:

- Elementary students receive remote instruction through an assigned Nebo remote learning teacher
  - Primary instruction focusing on reading, writing, mathematics, and science with supplemental support in other curricular areas
- Secondary students will receive instruction through Utah Students Connect courses
  - All required courses and many elective courses available
- Parent tutorials and videos will be provided for Canvas
- Individualized Education Program (IEP) and 504 plans may require the IEP or 504 team to reconvene

Sincerely,

Lana H. Hiskey
